Benton Seminary is comfortably full, but we could find room for some more hard-working students who mean business, and are always glad to share our room. It is certainly a merry crowd we have over here and but little inconvenience is experienced from the necessity

of large classes. Every one seems to be doing his best to excel his neighbor and all are working like Trojans.

This pretty spring weather has awakened the baseball propensities that have been dormant in the boys through the winter, and at recess the old campus is fairly alive with them. There is some fine material in school for a first-class nine.
